Straightening Machine

- **Straightness after machine**
regular type: 1mm/m
precise type: 0.7mm/m
- **Quick by-pass function to avoid bumping**
- **Adjust roll's height automatically**

End-face & Chamfer Machine

- Suitable for welded / seamless pipe
- Contour wheel to follow profile
- Large O.D range (O.D ϕ 21.3-820mm)
- Servo feeding, high-efficiency
- End-facing, outer / inner chamfer
- 1-3 pipes treated in single machine

End-face & Chamfer Machine

<https://marleymachinery.com/>

Pipe Hydro Testing Machine

- Multiple pipes treated (1-8 stations)
- Large testing pressure range(5-100MPa)
- High-efficiency(water filling+fast pressure-building)
- Multiple sealing method
(I.D seal, O.D seal, big-gap seal, end-face seal)
- Leakage judge by monitor pressure variation

pipe pneumatic testing machine

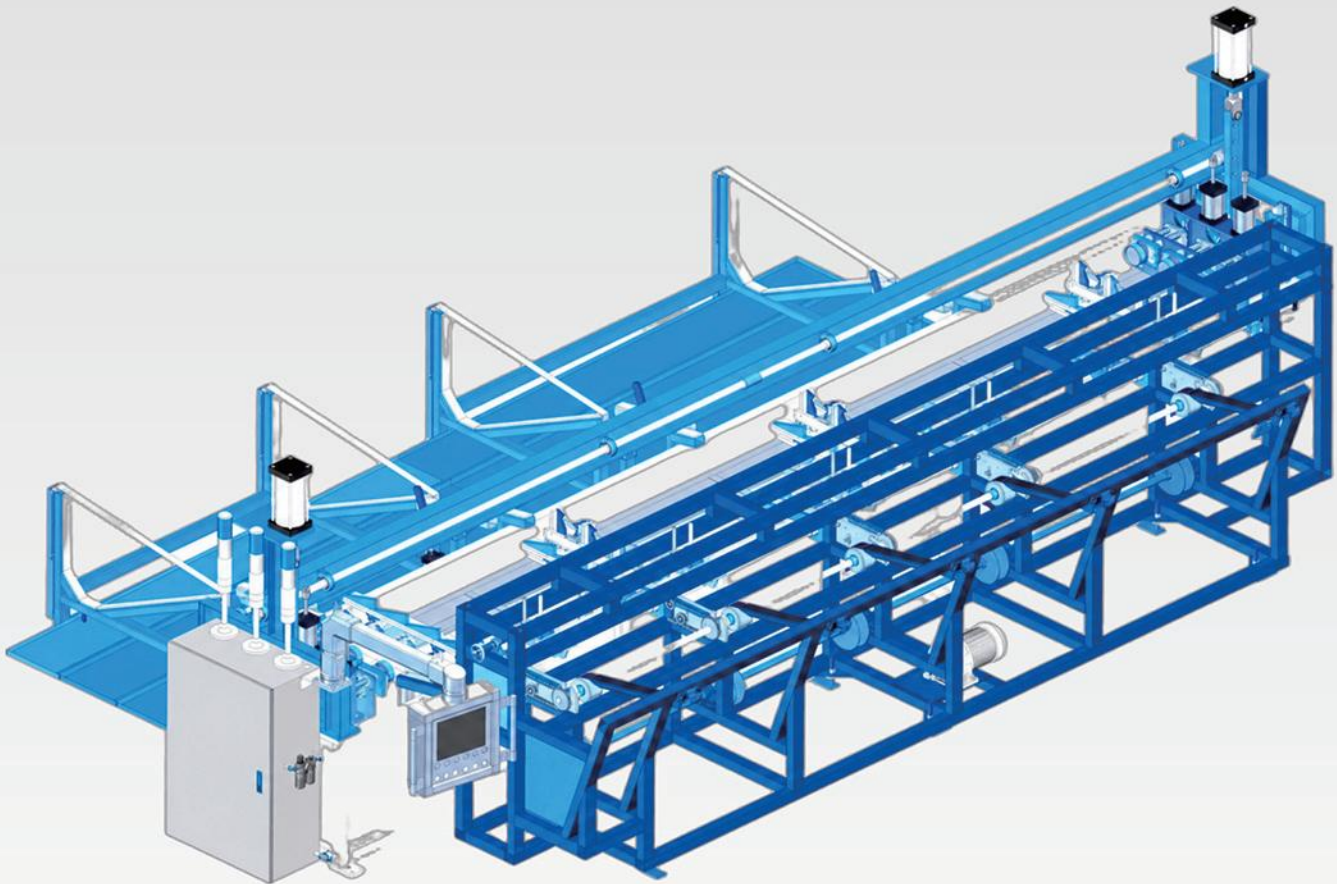

<https://marleymachinery.com/>

pipe pneumatic testing machine

This equipment is mainly used for stainless steel pipe gas tight pressure test, adopts radial seal or face mode Face seal wedge force multiplier patent design, pressure up to 1.5Mpa.

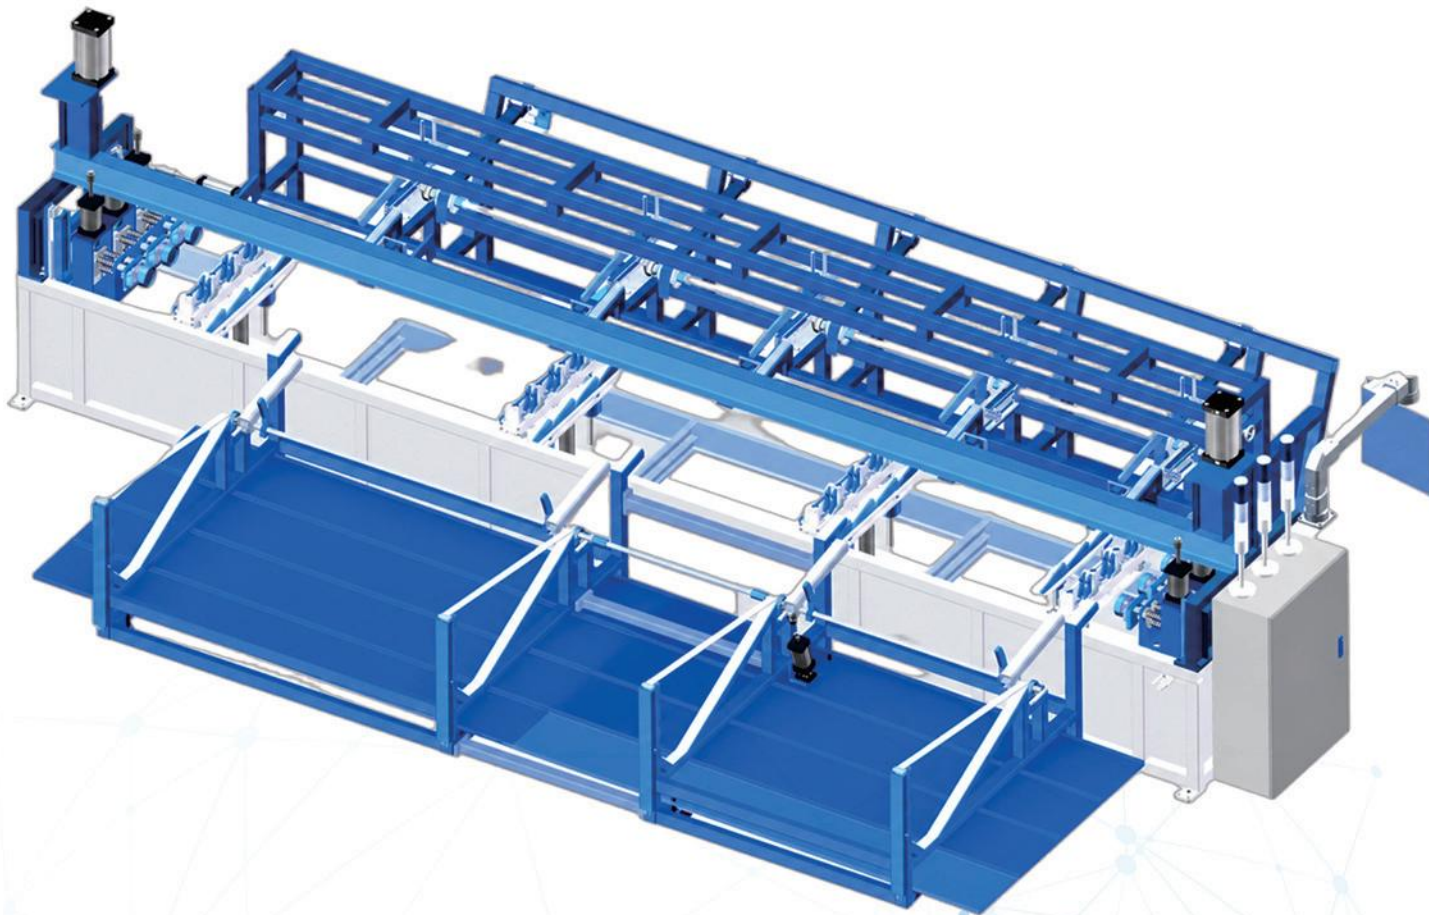

The radial sealing method can detect the pressure up to 3.0Mpa.

It has the functions of remote networking, visual intelligent detection system, automatic sorting of unqualified products, automatic shutdown alarm and so on.
